

**“Search within to discover the undiminishing wealth of the qalb
which is God”**

Farm Meeting, June 12, 2016

When Cathy Didona asked Bawa what she needed to do in order to know herself, Bawa explained mind and desire have created a huge rocky mountain. We need to make holes in this mountain using the hammer of wisdom. Since the hammering will cause pain to both the rock and the hand holding the hammer—we need iman that is stronger than the rock. That certitude will take away the pain and help us crack open the rock.

Read Q & A Vol. 1, pages 149-150

Bawa further explains what will happen as wisdom grows. He explains we need to cut the evil qualities within us and acquire His qualities in order to be reborn. Only if we do this can we see the kingdom of God.

Read Q & A Vol. 1, pages 177-178

So we need wisdom to discover where we came from. We need to research how the body was formed. Where did we come from? We will not discover this until we discover the point of the ruhul-qudsi. The ruhul-qudsi came from Allah. If we can discover that, that is the truth. That truth must go forward seeking the truth, for that truth is Allah.

Bawa continues to speak of the body and the need to cut away the evil qualities that hypnotize us.

Read The Choice, pages 12-15

Bawa now talks about true science. He explains that only by casting out all the evil qualities until there is only one point, can we know where peace of the soul resides. This he says is true science. As man progresses in his learning, he will reach a state where he can know God.

So where do we need to focus in order to do this research in analyzing ourselves? We must discover that treasure within ourselves which is hidden within our qalbs. This is an undiminishing wealth located in a secret place within our innermost heart.

Read Bawa Asks Bawa Muhaiyaddeen Vol. 3 pages 182-184

So how can we ever hope to discover this treasure of undiminishing wealth secreted within our qalbs? We need a true sheikh, a perfected man of wisdom who can teach us.

Read The Golden Words, pages 339-340

So as Bawa began to explain, God is a Power found within the 99 revolving around the 99. Cutting one particle millions upon millions of times until we disappear is the work that needs to be done. We can never fully analyze or know what such a Power is like, how great is this Power—God—the soul!
